

Todos Argos Mini II Installation Guide - Windows 98/Me/2000/XP

Note! Follow this Installation Guide if you wish to install your Argos Mini II using the installation program from Todos Data System AB. If you have Internet access you may also install/upgrade Argos Mini II using Windows Update, follow the instructions in the enclosed User Guide.

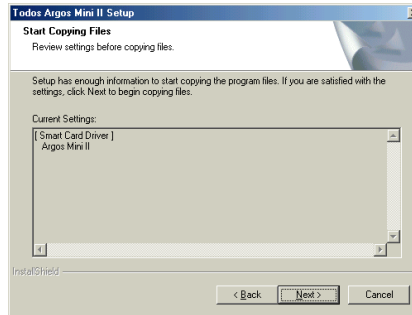

Note! Do not connect the Argos Mini II to your computer until asked to do so during the installation.

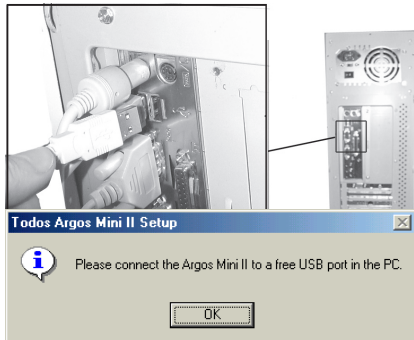

1. Download the file "am2_install.exe" from Todos homepage (www.todos.se), save the file on your computer, e.g. the Desktop.
2. Double click on the file "am2_install.exe" to start the installation program.

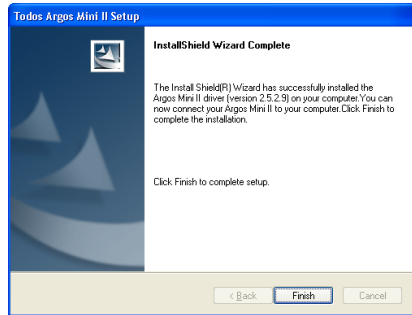

3. InstallShield Wizard for Todos Argos Mini II starts. Click "Next".

4. Click "Next" to begin copying the Argos Mini II files to your computer.

5. Connect the Argos Mini II to a vacant USB port on your computer. Click "OK".

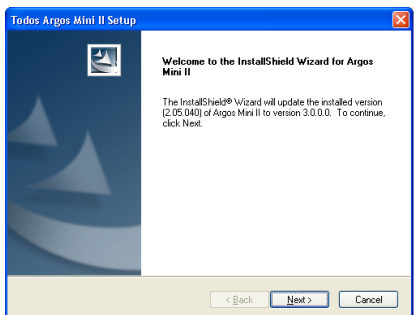

6. Your Argos Mini II is installed. Click "Finish" to exit the installation program.

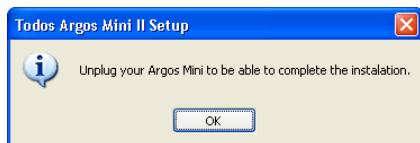

Note! Windows 98/Me users must restart the computer before using Argos Mini II.

Todos Argos Mini II Upgrade - Windows 98/Me/2000/XP

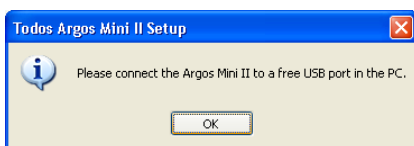

If you already have installed Argos Mini II on your computer, the installation program will automatically upgrade to the latest drivers.

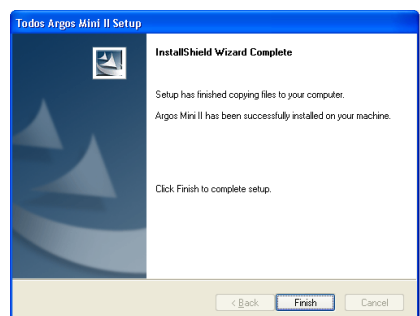

3. InstallShield Wizard for Todos Argos Mini II starts. Click "Next".

4. Disconnect the Argos Mini II from your computer. Click "OK" when finished.

5. Connect the Argos Mini II to a vacant USB port on your computer. Click "OK" when finished.

6. Your Argos Mini II drivers have been updated. Click "Finish" to exit the installation program.
